Homes today are built air tight for energy efficiency.

THE PROBLEM

Pollutants are Trapped Inside

HEBA 365

- 
- **DUST LESS**
 - **BREATH EASIER WITH ALLERGIES/ASTHMA**
 - **CLEANER COILS / BLOWER / DUCTS**
 - **ONLY CHANGE FILTER ONCE A YEAR**

Your filters MERV Rating is a good way to help judge the effectiveness of the filter. MERV means

Minimum Efficiency Reporting Value

The higher the MERV value is the value the more efficient the filter will be in trapping airborne particles.

Another consideration is air flow through the your HVAC system.

Leaving a dirty air filter in place or using a filter that is too restrictive may result in low air flow and possibly cause the system to malfunction.
