

# ***SuperA Clear*** ***High Efficiency Particulate Air Filter***

## ***General***

HEPA filters are designed for:

- Negative air machines
- Environmental remediation
- Mold abatement, restoration, and renovation
- Asbestos abatement

SuperAclear feature a media separated by aluminum sealed by polyurethane bond in a particle board frame. 1000 CFM and 2000 CFM models available.

## ***Physical Properties***

Frame:	Particle Board
Efficiency:	99.97% on 0.3 micron particles
Size :	24" x 24" x 11-1/2"
Separators:	Aluminum
Bond:	Polyurethane
Gasket:	Neoprene Sponge
Faceguard:	None

## ***Guarantee***

Each SuperAclear is individually tested before leaving the plant. Guaranteed to reach the site meeting the rated efficiency. All test data is recorded on each label on every filter. Records are kept for each test.

## ***Performance Data***

Actual Size	Rated Airflow Capacity (SCFM)	Rated Initial Resistance (in. w.g.)
24"x24"x11-1/2"	1,000	1.1
24"x24"x11-1/2"	2,000	1.5
